Unidesktop (Parallels)
## Installation instructions to configure Mac client

1. Install the '**Parallels Client'** from the App Store.
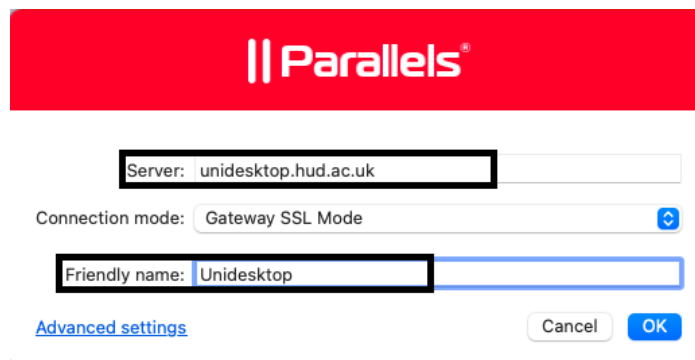

Parallels Client
Business
GET

2. Now create a connection by selecting '**Add**'.
3. Then choose '**Parallels Remote Application server**'.

You have no connections configured.

Would you like to add new or import existent connection?

Add

Import

Cancel
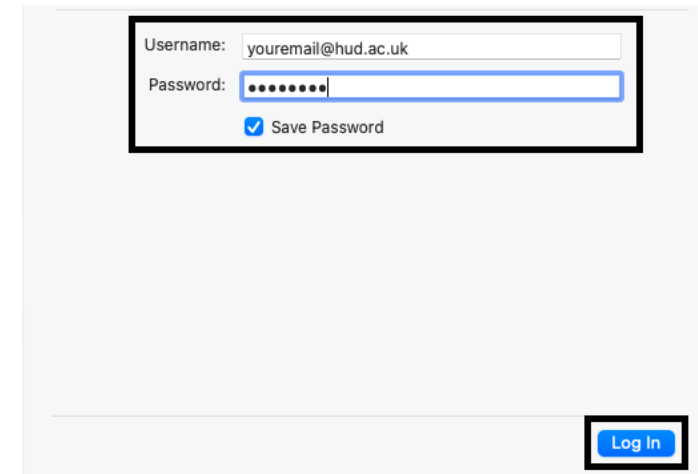

Parallels Remote Application Server

Standard RDP

Cancel

4. Enter the server address as shown and give this a friendly name of Unidesktop.

Server: **unidesktop.hud.ac.uk**
Friendly Name: **Unidesktop**

|| **Parallels**®

Server: unidesktop.hud.ac.uk
Connection mode: Gateway SSL Mode
Friendly name: Unidesktop

Advanced settings   Cancel   OK

5. Now you will need to add your University email address and password. Then select '**Save Password**' and choose to '**Log In**' at the bottom.

Username: youremail@hud.ac.uk
Password: ••••••••
☑ Save Password

Log In

6. You should now be all setup and you will be able to run the Unidesktop application from here.
